TRAFFIC & BONNET CLEANER

Adds Stain-Resistant
Protection From Spills &
Soil Buildup

Soil Guard 2000™ Formula Contains
DuPont Zonyl® Soil & Stain Protector
& Special Dye Site Blocker

NET CONTENTS: 1 QUART

DESCRIPTION

This product is specially formulated with **Soil Guard™ 2000**, for bonnet buffing as an interim system that is fast, uses low moisture, and dries quickly to maintain a high quality appearance level. An excellent prespray on high traffic lanes of carpet prior to extraction cleaning. The built-in emulsifier dissolves the stubborn greasy soil for deep cleaning, and more importantly, reduces the resoiling rate of the carpet. Does not contain any optical brighteners.

The new **Soil Guard™ 2000** cleaning technology incorporates DuPont Zonyl® Soil and Stain Protector to deliver a Traffic & Bonnet Cleaner that cleans carpets faster and more efficiently than any product on the market today. This product is most effective on carpets that have been previously treated with a mill-applied fluorochemical stain-resistant treatment.

DIRECTIONS

Vacuum carpet thoroughly. Test carpet for colorfastness in an inconspicuous area before any method of cleaning. If the carpet is staintreated, it is not necessary to spot clean prior to cleaning. If the carpet is untreated, spot clean first.

First Method: Prespray- spray over soiled areas. Allow to dwell 5 minutes then follow up with the extraction method.

Second Method: Bonnet Buffing- For lightly soiled carpets or rugs, add to pump up sprayer. Prespray the carpet and bonnet until wet to touch of the hand, then rotary bonnet buff. Submerged Method- for heavily soiled areas, and medium drying time (20-30 minutes) pour in a wringer bucket, submerge bonnet, wring out thoroughly then proceed to buff with rotary machine. For greater results, use two buckets and two bonnets. One for rinsing and the second for cleaning solution.

Third Method: Use rotary machine with a solution tank. Pour the prespray into the tank, release through a flow-thru bonnet driver into the bonnet and proceed to buff. Use caution to not overwet the carpet with solution.

DIRECCIONES

el vacío alfombra a fondo. Pruebe la alfombra para el colorfastness en un área discreta antes de cualquier método de limpieza. Si es la alfombra staintreated, él no es necesaria manchar limpio antes de la limpieza. Si la alfombra es untreated, primer limpio del punto.

Primer Método: Áreas manchadas excedente del aerosol de Prespray- . Permita para morar 5 minutos después siga con el método de la extracción.

Segundo Método: El capo que pulimenta para las alfombras o las mantas ligeramente manchadas, agrega a la bomba encima del rociador. Prespray la alfombra y el capo hasta que es mojado al tacto de la mano, entonces piel de ante rotatoria del capo. El método sumergido para las áreas pesadamente manchadas, y el tiempo de secado medio (20-30 minutos) vierte adentro un cubo del escurridor, sumerge el capo, saca hacia fuera

a fondo entonces procede a la piel de ante con la máquina rotatoria. Para mayores resultados, utilice dos cubos y dos capos. Uno para aclarar y el segundo para la solución de la limpieza.

Tercer Método: Utilice la máquina rotatoria con un tanque de la solución. Vierta el prespray en el tanque, lance con a flui-por conductor del capo en el capo y proceda a la piel de ante. Tenga cuidado no al overwet la alfombra con la solución.
