

# Disinfecting Indoor Sports Equipment

As COVID-19 lock down restrictions relax, people are heading back to the gym.

Misco Products offers disinfectants approved by the EPA that have been qualified for use against SARS-CoV-2, the novel coronavirus that causes COVID-19. These products can be used to clean and disinfect exercise mats, gym equipment, exercise equipment and any other high touch areas found in gym facilities.

## How to Disinfect Your Facility

1. Remove any visible soil from the surface with an all-purpose cleaner or a 2 in 1 disinfectant.
2. Apply the appropriate disinfectant with a cloth, sponge, or spray on the affected area and keep it wet for 10 minutes. If it dries, it needs to be reapplied.
3. Only after the instructed amount of time, wipe the surface dry with a clean cloth or wiper.
  - a. Do not reuse cleaning cloths or wipers for more than one area
  - b. Dispose of or deposit for cleaning as appropriate.
4. Remember proper hand hygiene is a cornerstone of any wellness program. Wash often, especially after coming into contact with high touch surfaces. Use warm water and soap, wash vigorously for 20 seconds, then rinse.
